

The average American's media diet consists exclusively of portions obtained from but twelve large multinational corporations, all with very similar interests. Allowing cross-ownership of media would narrow this already limited spectrum even further, and must be prohibited. Freedom of speech is for humans, not for entities. It seems to me that this is an elementary ethical truism, but some legislators seem to disagree. I would hope that your organization sees the wisdom in not allowing media corporations to control public debate any further.

Thank You,

Jordan Olsommer
